

Your Choice For **CUSTOMIZABLE
DRINKING SOLUTIONS**

CHOICEH₂O CAPS

Introducing the Choice H₂O Dispenser Cap.

We have created a standard size cap that can be customized to fit any thread design and is scalable to any size bottle and chamber size. Our 28mm cap holds three grams of ingredients and is easily dispensed for convenience **with just one push.**

No impact special shelving or packaging requirements.

Slight increase in cap height.

Use your own flavor or we can create a custom mix for you.

Works with your existing capping machine with little to no upgrades needed.

Can be customized to fit any thread design—it's scalable & customizable.

Initially designed for flavored and vitamin water bottles, it can be

used for applications for vitamins, dairy products, flavored alcohols and precision distribution of medications. We are introducing caps for milk and an insert to dispense one of four additives to a bottle. Our patented design keeps the additives fresh and leak free until distribution of the product is desired.

Our milk cap design will allow the consumer to choose one of two flavors of milk:

> chocolate

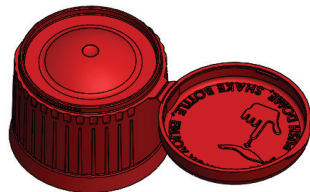

> strawberry

Using our cap to introduce the sugar and flavor at time of use **increases the shelf life by 36%!**
